ABOUT APEX

Apex Anesthesia Services is a mobile practice offering pediatric and adult anesthesia across the state of Washington. We use state of the art, portable monitoring and anesthesia equipment to transform any office into a virtual “Ambulatory Surgery Center”. We use the newest and safest techniques to provide the highest level of comfort while allowing rapid recovery. Apex creates a positive patient-centered experience through individualized care and treatment for you, our patient.

At Apex, we know firsthand that office-based anesthesia is beneficial for both the dentist and the patient

ADVANTAGES & BENEFITS OF APEX SAFE

- Our providers are board-certified, licensed, credentialed and skilled in all types of anesthesia in all ambulatory settings.
- All patients are monitored with the same standards of care as in the hospital. The anesthesia provider **NEVER LEAVES** the patient side. Our anesthetics are safe and predictable enough that recovery time takes as little as 30 minutes.
- Our equipment is routinely inspected. We carry all necessary emergency medications. Our state of the art monitoring ensures patients are “asleep”, comfortable and safe during the entire procedure.

Apex takes every step and precaution possible to ensure safety. You can be confident with your proposed course of treatment. This group was formed to serve dental patients who previously lacked access to anesthesia care provided with strict attention to safety, quality and comfort. This has been Apex Anesthesia Services’ sole mission since day one.

COMFORTABLE

Patients do not have to go to the hospital or surgery center for their procedures. The familiarity of the surroundings and staff sets the stage for a positive patient experience.

LESS TIME UNDER ANESTHESIA

With our innovative techniques, the anesthesia time (from the start of the anesthesia to the procedure start time) is about one-third of the time compared to the hospitals or surgery centers.

EFFICIENT

Save several hours compared to having your procedure done in a hospital. All patient medical information is readily available for review by your anesthesia provider using encrypted iPads. We can provide patient forms and information in Spanish and Russian languages.

FEWER COMPLICATIONS

Compared to numerous research studies, the post-operative nausea and vomiting rates at Apex Anesthesia is much lower than patients undergoing the same procedure in the hospital. The recovery time is generally less than 30 minutes.

COST-EFFECTIVE

We accept most major insurances. Our total fee is often less than the insurance deductible and co-insurance combined if the procedures were done in the hospital or surgery center.

Patient safety and comfort can be assured by our staff while reducing cost by avoiding hospital or surgery center fees.

We are always just a phone call away to answer your questions! Our staff will happily address your questions to help alleviate any concerns. Please contact us at (509) 764-5399 or visit: ApexMobileGA.com
